MapInfo/GeoResults Business Points  
Data Version: December 2003

**NOTE:**  
Some business locations may be inaccurately represented on this map. Businesses that reported PO Boxes or Rural Routes as their primary mailing address were geocoded at the centroid of their ZIP code. This causes them to appear on the map on top of one another, and as a result, only a few points are visible. This error is inherent in the nature of the Business Points dataset. Physical addresses would allow us to more accurately map these businesses.
